HARISH S

Full Stack Developer

harisho8003@gmail.com | 8610436389 | Rajapalayam, India | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience across React.js, FastAPI, and MySQL, building scalable web applications, RESTful APIs, and responsive, component-driven UIs. Strong foundation in API development, database design, performance optimization, and clean, maintainable code, complemented by a UI/UX design background using Figma.

SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design, Component-Based Architecture

Backend: FastAPI, Python, REST API Development, SQLAlchemy, JWT Authentication

Database: MySQL, SQLite

Languages: Python, Java, C, JavaScript

Tools & Design: Git, GitHub, Figma, Canva, Jira

Core Concepts: REST API Integration, Debugging, Performance Optimization, Clean Code Practices

INTERNSHIP EXPERIENCE

Full Stack Developer — YounderBots *01/2026 – 04/2026 | Kovilpatti, India*

- Built full-stack web applications using React.js, Tailwind CSS, and FastAPI, developing 15+ reusable UI components and standardizing a shared component library across 3 product modules.
- Engineered dynamic, data-driven interfaces with React Hooks, state management, and REST API integration, while developing backend endpoints, database operations, and business logic in FastAPI.
- Optimized application performance through frontend code refactoring, asset optimization, and backend query efficiency, improving page load speed and overall maintainability.

UI/UX Designer — C-DAC *07/2024 – 11/2024 | Chennai, India*

- Designed user-friendly interfaces for government web applications using wireframes and prototypes in Figma, improving usability, accessibility, and overall user experience.
- Collaborated with development teams to translate designs into responsive, scalable solutions, optimizing user workflows for government-based digital services.

PROJECTS

Kaara Saaram — Restaurant Web Application (React, FastAPI, MySQL)

- Developed a full-stack South Indian/Chettinad restaurant platform with a React frontend and FastAPI + MySQL backend, covering menu, reservations, gallery, offers, and admin management modules.
- Built JWT-based authentication with role-based access control and RESTful CRUD APIs using SQLAlchemy and Pydantic, replacing localStorage-based data with live, tested backend integration.

Aakam Shine — Startup Ecosystem Platform (React.js)

- Engineered a scalable startup incubation platform integrating mentor networks, investor portals, event showcases, and founder dashboards into a unified digital experience with modular, reusable UI components.

Kicks — Modern E-Commerce Platform (React.js)

- Designed and developed a sneaker e-commerce platform with product discovery, curated collections, authentication workflows, and a smooth, responsive end-to-end shopping experience.

Virtual Trial Room — WebAR E-Commerce Solution (React.js) | Best Project, 2024

- Built a WebAR-powered virtual clothing try-on platform with real-time visualization, recognized as Best Project for improving user engagement and purchase confidence.

EDUCATION

M.Tech in Computer Science and Engineering *2021 – 2026*

Sri Ramakrishna Engineering College, Coimbatore, India
